PROJECTS

GADGETHUB
- It was a first group project that we have worked on which was e-commerce based.
- It used simple crud operation for this project.

ANIMECORNER
- It was second project that had to be done solo.
- This project was Rating based project which was done using Bayesian average ratings algorithm.
- https://github.com/Ma0uSaMa/animecorner this project has been uploaded to my github account to keep track.

EXPERIENCE

The only current experience that I have right now the college project that I have done for two semester which first was a group project and second was a solo project.
